Work Experience

SFCC Frontend Developer, Red Van Workshop, Loveland Remote/Boulder, CO Dec 2022 - Present
Javascript/CSS/HTML/NodeJs/Apex/Java/SOQL

- Developed and delivered eight websites using SFRA in four months, resulting in a 15% reduction in client expenses (Samsonite brand) and a 20% increase in project completion efficiency.
- Developed and created custom Page Designer components for front-end (Samsonite Canada), improved front-end functionality by 30%, addressing issues related to coupon discounts during the checkout process, leading to a 25% decrease in abandoned carts.
- Contributed to back-end development by implementing features that dynamically adjusted product prices based on variants. Log clean-up on the server side after site launch, resulting in a 15% page load time.
- Conducted quality assurance (QA) testing, identifying and resolving issues promptly, resulting in a 15% decrease in post-launch bug reports.
- Created and managed Jira tickets efficiently (Ebags, Hartman, etc.) reducing resolution time by 20% and maintaining a 95% customer satisfaction rate.
- Working knowledge with headless commerce/PWA Kit

SFCC Intern Developer, Red Van Workshop, Loveland Remote/Boulder, CO Feb 2022 - May 2022
Javascript/CSS/HTML

- Successfully replicated the Uniqlo website using SFRA.
- Designed and constructed the front-end of the website, demonstrating proficiency in CSS.
- Enhanced user experience with seamless navigation, filter-based product browsing, efficient search functionality, and seamless purchasing capability.
